

**New Shower for Mobile Homes for Seniors and People with Disabilities!**

Standard Showers have a 5" threshold which is difficult and unsafe for many people to step over. Falls are a major cause of death and disability and most falls occur in the bathroom. Renovating a bathroom in a mobile home can be tricky as most fixtures are not made to fit smaller locations. Aquassure is pleased to announce its new shower model specifically designed to fit into the pocket of a mobile home shower space. Low threshold and barrier-free showers in larger sizes have been available for many years, and we are pleased to bring this newest solution to British Columbia!

The new showers are 54" wide by 30" deep and feature a 3/4" beveled roll-in threshold. They are available with a barrier-free accessory package that includes grab bars and a fold-up seat for easy seat-to-seat transfers.

"Many seniors live in mobile homes and we often face challenges in making their homes accessible due to space constraints. This product provides needed accessibility for those living in smaller spaces," says Matthew Longman, CEO of Aquassure and a Certified Aging in Place Specialist.

Aquassure's shower products are backed by a manufacturer's 30 year limited warranty. All showers are manufactured with durable plywood cores, composite materials and tough gelcoat finishes.

Aquassure Accessible Baths is a Kelowna-based distributor and designer of accessible bathing products. Their products are sold through local distributors across Canada and the US. They have the only Certified Aging-in-Place Specialist, outside of the Lower Mainland and are Better Business Bureau accredited. They can be reached online at [www.aquassure.com](http://www.aquassure.com) or by phone 1-866-404-8827.
